

SEO Translation

Are you thinking about maximizing your search engine visibility?

Then try our SEO translation service. ACP Traductera has extensive experience of translating keywords for SEO purposes. We've provided SEO keywords translation services in a variety of fields including engineering, automotive, medicine, pharmaceuticals, chemistry, software & IT, games or marketing.

SEO TRANSLATION

- Translate a list of keywords from the source language into the target languages, including suitable synonyms, making sure that they match the main content of a website and get the best search engine hit rates
- Every single attribute on a web page should be translated in a way that makes the page as attractive as possible to search engines in the target language
- SEO translation content = keywords, expressions, titles, tags, anchor texts, script messages, etc.

SEO TRANSLATION CASE STUDY

Search Engine Optimization translation for a travel technology company

TASK

The task was to create a localized version of the source keyword list using creative and attractive language which would lead to the best possible search engine position of the localized website.

The task was done not only by native speakers of the target language but also those living in the target language country in order to optimize the results from the target language IP address by analyzing search engine results for suggested keywords and suggesting more appropriate ones in the target language.

Source language: English

Target language: Czech, Estonian, Kazakh, Latvian, Lithuanian, Polish, Russian, Slovak, Ukrainian
